Personal Details

Date of Birth	5 October 2002
Place of Birth	Setif, Algeria
Nationality	Algerian
Languages	Arabic (Native), English (C2 / Professional), French (B2 / Intermediate)

Profile

Full Stack Developer with production experience building web and cross-platform mobile applications using Django REST Framework, React, TypeScript, and Flutter on PostgreSQL, with additional back-end experience in Node.js. Specialised in high-performance backend architecture — REST API design, real-time systems, caching, and containerised deployment — and experienced working directly with clients and cross-functional teams in both freelance and institutional settings.

Work Experience

Dec 2025 – Present

Freelance

Backend Architect & Admin Frontend Developer

Rezervitoo (Client Project), Algiers, Algeria

- Architected a multi-provider enterprise travel and booking platform supporting four provider types (hotels, hostels, agencies, hosts), deployed via Docker Compose, Nginx, and Cloudflare.
- Designed and documented 100+ REST API endpoints across seven resource domains, with role-based access control enforced across all routes.
- Reduced API response time from 176 ms to 38 ms on repeat requests through Redis caching with client-side query synchronisation.
- Built a React/TypeScript admin panel with Google OAuth2 authentication, transactional email, and progressive provider onboarding.

Jan 2024 – Apr 2025

Apprenticeship

Full Stack Developer

Faderco, Dual-Study Program, Setif, Algeria

- Delivered an internal recruitment portal (Django, React) digitising the full HR pipeline for 50+ candidates per cycle, replacing manual spreadsheet tracking.
- Shipped the company's first remote-interview capability (WebRTC), removing hours of round-trip travel for candidates.
- Managed the full project lifecycle solo across 10 months, from requirements gathering with HR stakeholders through production deployment.

Selected Projects

BrewPhoria

*Flutter . Node.js .
TypeScript*

Coffee Ordering Platform (Mobile + API)

- Cross-platform Flutter client (Riverpod) backed by a layered Node.js / Express / TypeScript API with Prisma and PostgreSQL — 40+ endpoints across 11 resource domains.
- Atomic transactional checkout, an offline-first cart that merges into the account on sign-in, a server-side pricing/modifier engine, and a tiered loyalty programme.
- Integrated a tool-augmented AI assistant (Google Gemini) and Firebase authentication and push notifications; containerised with Docker Compose.

FitGuild

Django . React

E-Commerce Platform

- Sub-2-second catalogue load times via lazy loading, image optimisation, and multi-layer Nginx caching.
- Stripe Checkout with server-side webhooks handling payments, order transitions, and real-time inventory; full commerce feature set (variants, cart, wishlist, orders, reviews).

PraxisOS

Electron . React . SQLite

Local-First Personal Management App

- Engineered an open-source, local-first desktop application using Electron, React, and TypeScript, ensuring complete data privacy via SQLite and Drizzle ORM.
- Implemented professional-grade features including a seamless auto-update pipeline without manual downloads, and background system tray integration.
- Developed a scrollytelling landing page and managed the full product release, including software certification and legal documentation.

Education

Oct 2022 – Apr 2025

Diploma in Computer Science — Database Foundations

Baaich Abdelkader Institute, Setif, Algeria

Ranked 1st in cohort. Final GPA: 14.79/20. Dual-Study Program with a 2.5-year integrated placement at Faderco.

2025

Advanced React & Frontend Engineering Certification

Codecademy (Remote)

Technical Skills

Languages

Python, JavaScript (ES6+), TypeScript, Dart, SQL

Backend

Django, Django REST Framework, Node.js, Express, Prisma, PostgreSQL, Redis

Frontend / Mobile

React.js, Tailwind CSS, Flutter, Riverpod

Infrastructure

Docker, Nginx, Linux / VPS, Git, GitHub Actions
